*Election/Restrictions*

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12; 24-25, drawn to a method of calculating at least one physical parameter of a film and an apparatus comprising an optical instrument for measuring an optical property of a film, classified in class 356, subclass 445.
  - II. Claims 13-23, drawn to an apparatus for producing a film having at least one desired physical parameter and a method of material engineering for producing a film and a process for producing a film, classified in class 438, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. In the instant case Inventions I and II are independent from each other. Invention I claims a method of calculating at least one physical parameter of a film and an apparatus comprising an optical instrument for measuring an optical property of a film, which does not require the apparatus for producing a film having at least one desired physical parameter and the method of material engineering for producing a film and the process for producing a film of Invention II. The apparatus, method, and process of Invention II does not require the method of calculating at least one physical parameter of a film and the apparatus comprising an optical instrument for measuring an optical property of a film of Invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
